October - 2023

1. INTRODUCTION

- **OVERVIEW**

In this project shows the process of voting and methods of voting.
There is an huge ideology of making votes

- **PURPOSE**

Though this project we can understand the purpose of voting. One of the achievements of this project is knowledge of voting

4. ADVANTAGE & DISADVANTAGE

- The main advantage of this project is to know about our voting Method.
- Then the next advantage is the knowledge of how to improve our Voting method .
- The disadvantage of this project is this knowledge is only for the Educated people

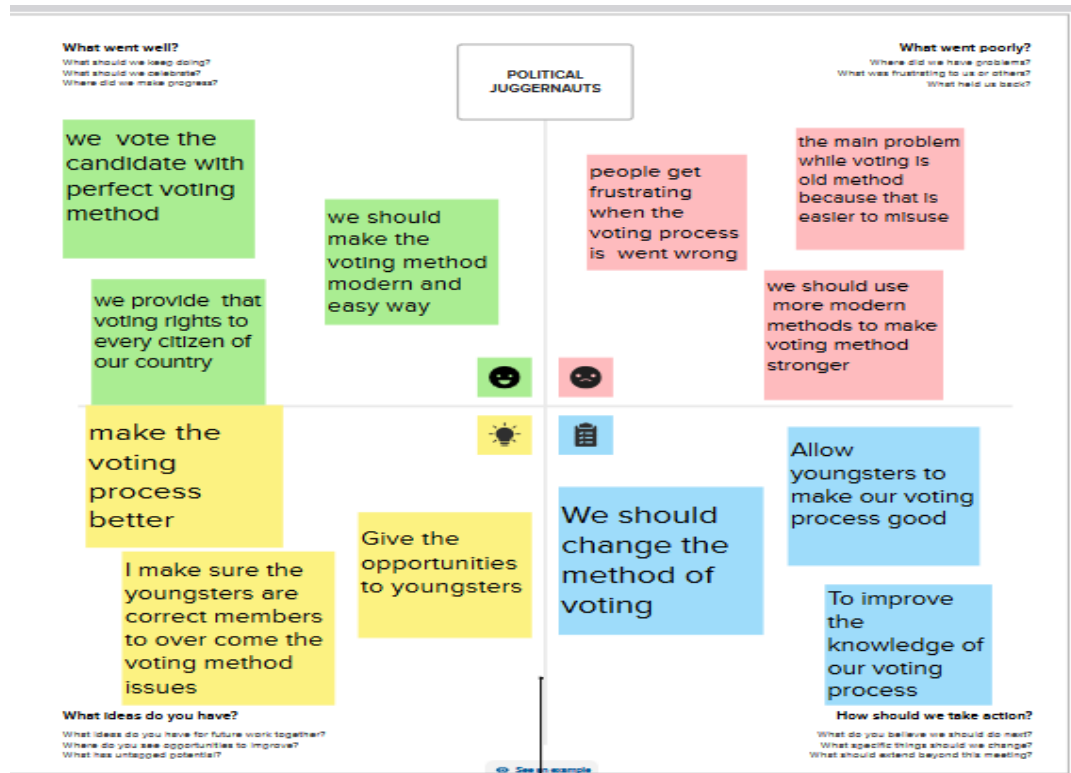

5. APPLICATIONS

This solution are applied in election board but my idea is that We may apply this solution to every voting areas The Lok Sabha is composed of representatives of people chosen by direct election on the basis of Universal Adult Suffrage. The Constitution of India allows for a maximum of 550 members in the House, with 530 members representing the States and 20 representing the Union Territories. The 17th Lok Sabha was formed by the members elected in the 2019 Indian general election. Elections, all across India, were conducted in seven phases from 11 April 2019 to 19 May 2019 by the Election Commission of India.

The Bharatiya Janata Party received 37.36% of the vote, the highest vote share by a political party since the 1989 general election, and won 303 seats, further increasing its substantial majority. In addition, the BJP-led National Democratic Alliance (NDA) won 353 seats.

2. PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy map

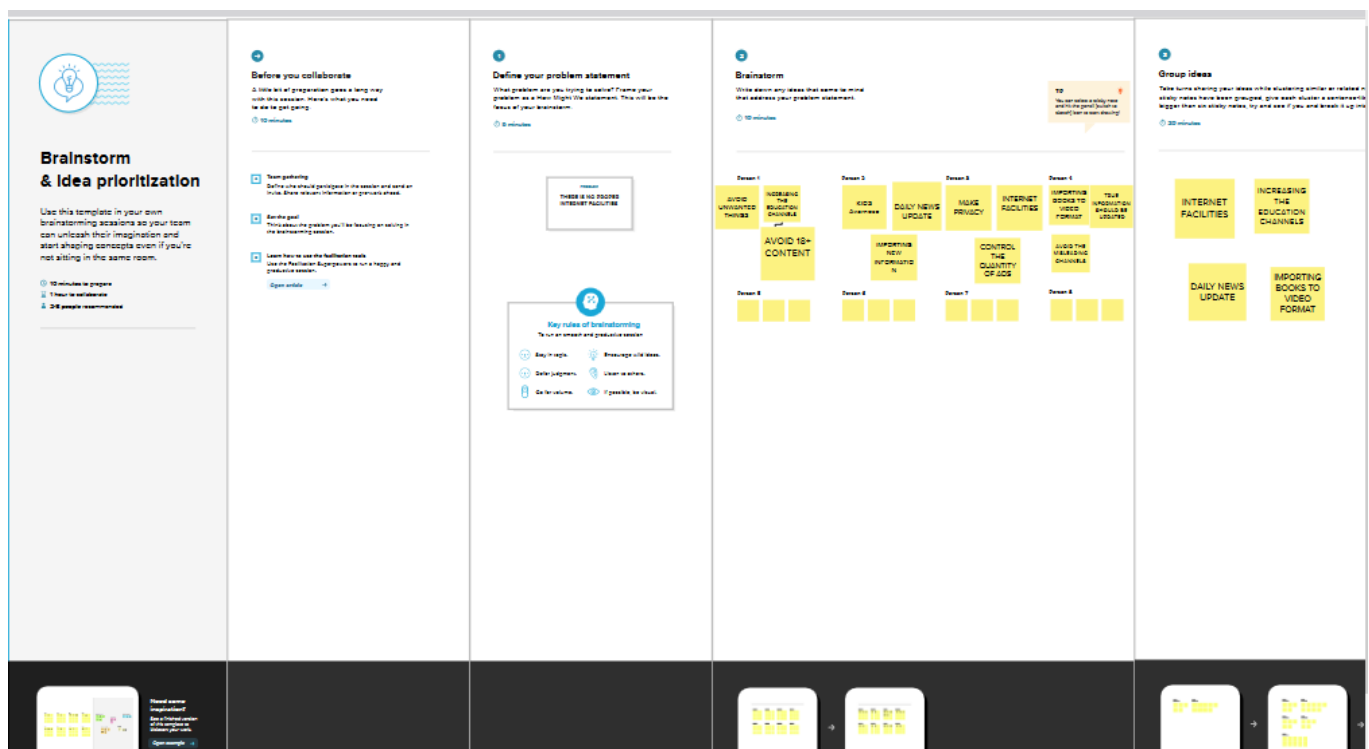

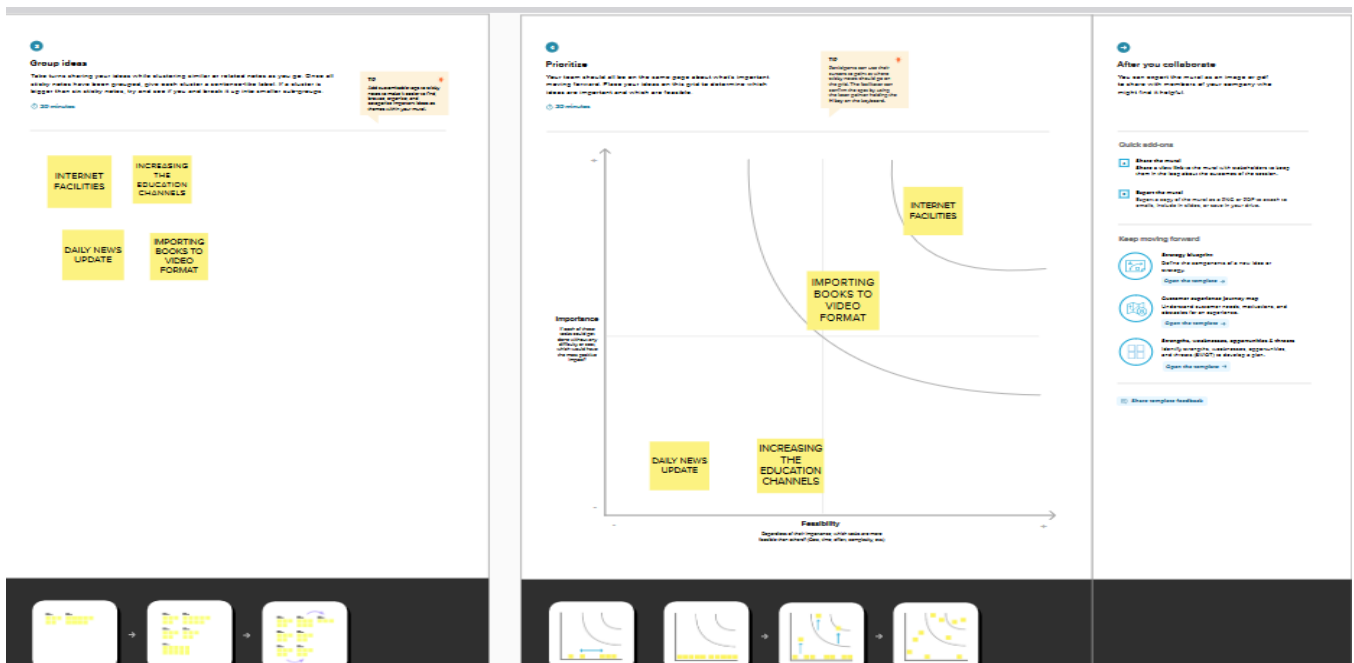

Discussion:

In this part we made our idea about voting method and drawbacks

Included that we gave an strong idea about voting method and election process

2.2 Ideation & Brainstorming map

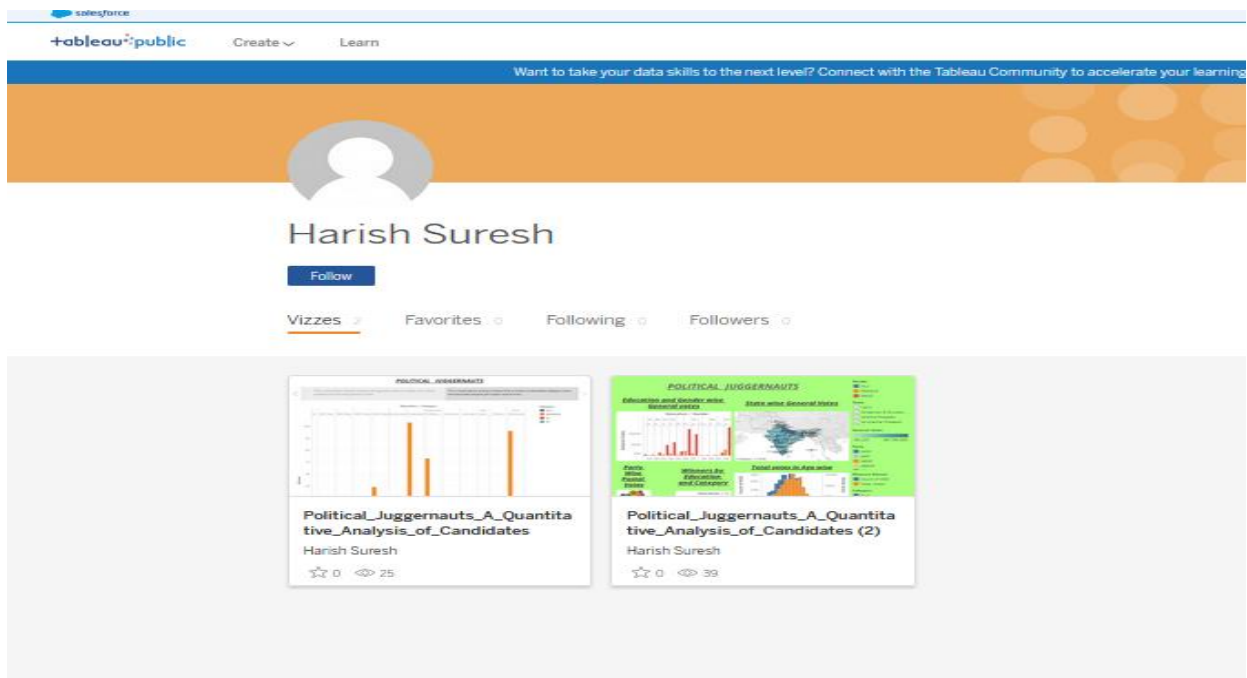

Discussion:

In this part we made a discussion about the ideas to improve our voting method and voting process. Each person in our team gave an idea about our election process

3.RESULT

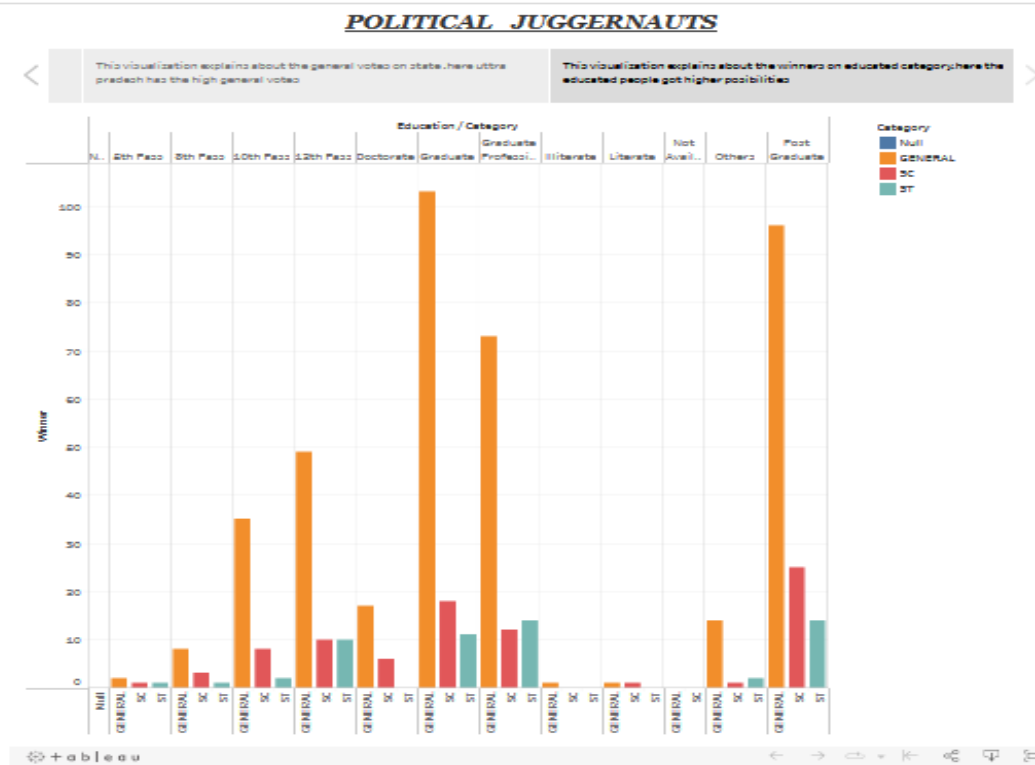

3.1. Tableau public profile page:

Discussion:

In this part we made project by the help of tableau. We made different maps with different data about this topic

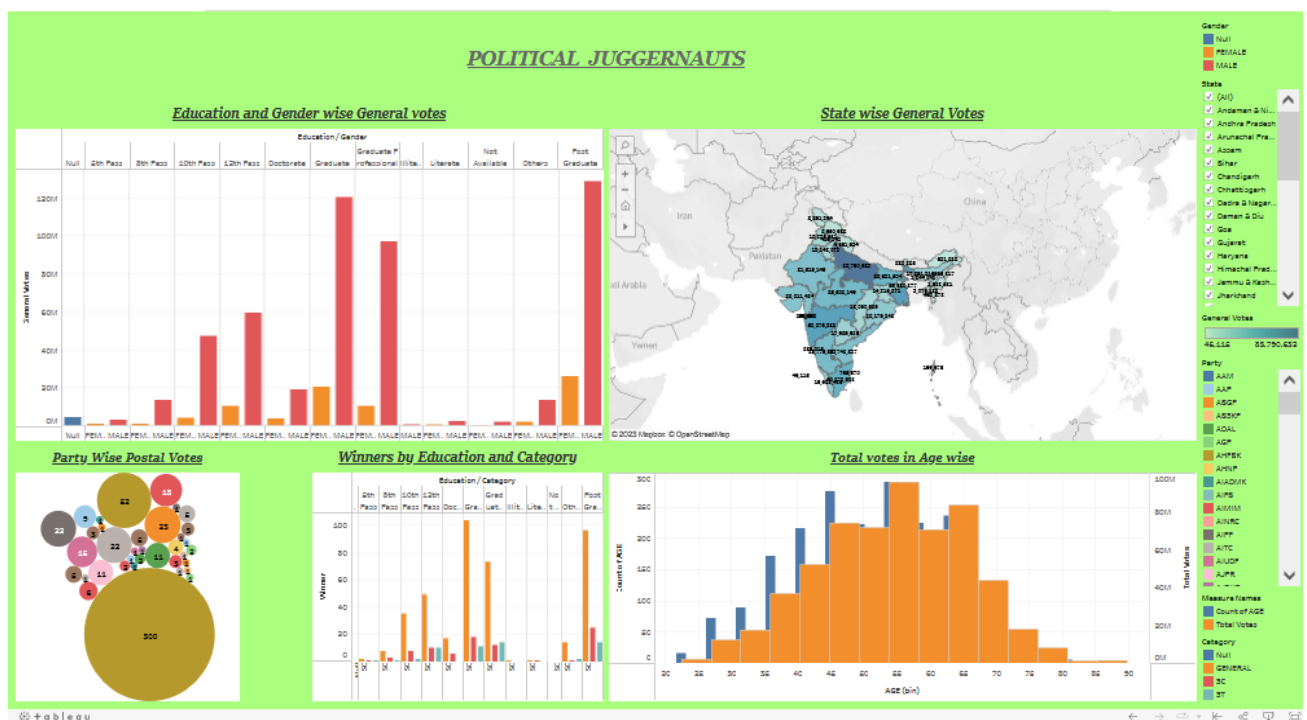

3.2. Story:

Discussion:

In this part we made few stories about our topic .we made five stories by the help of respective data

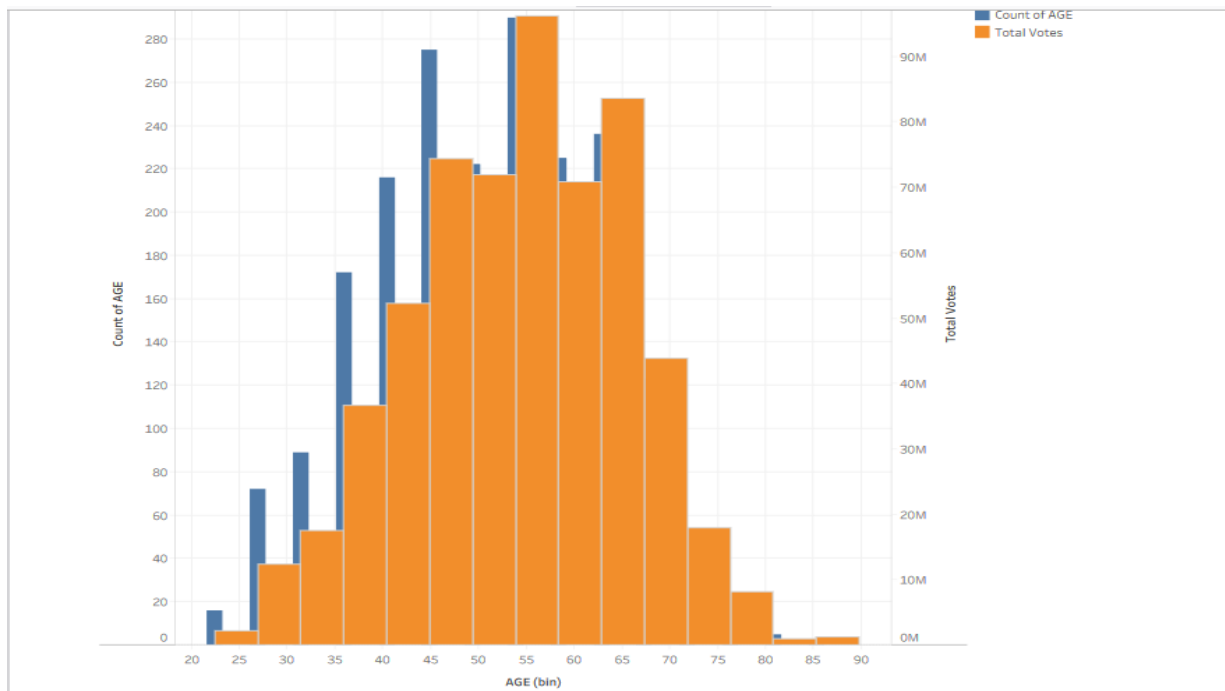

3.3.Dashboard :

Discussion:

In this part we made dashboard about our topic .we made a dashboard by the help of respective data

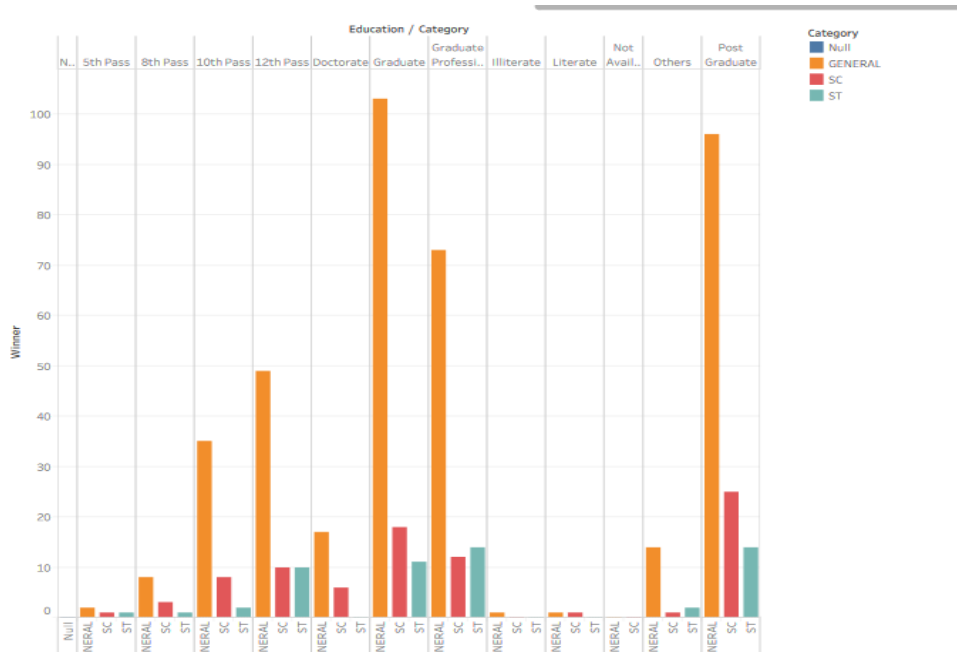

3.4. Total votes in Age wise:

Discussion:

This visualization explains about the total votes on age wise here the age of every voting persons are equal to the total votes so that this visualization clearly explains that every vote is important .

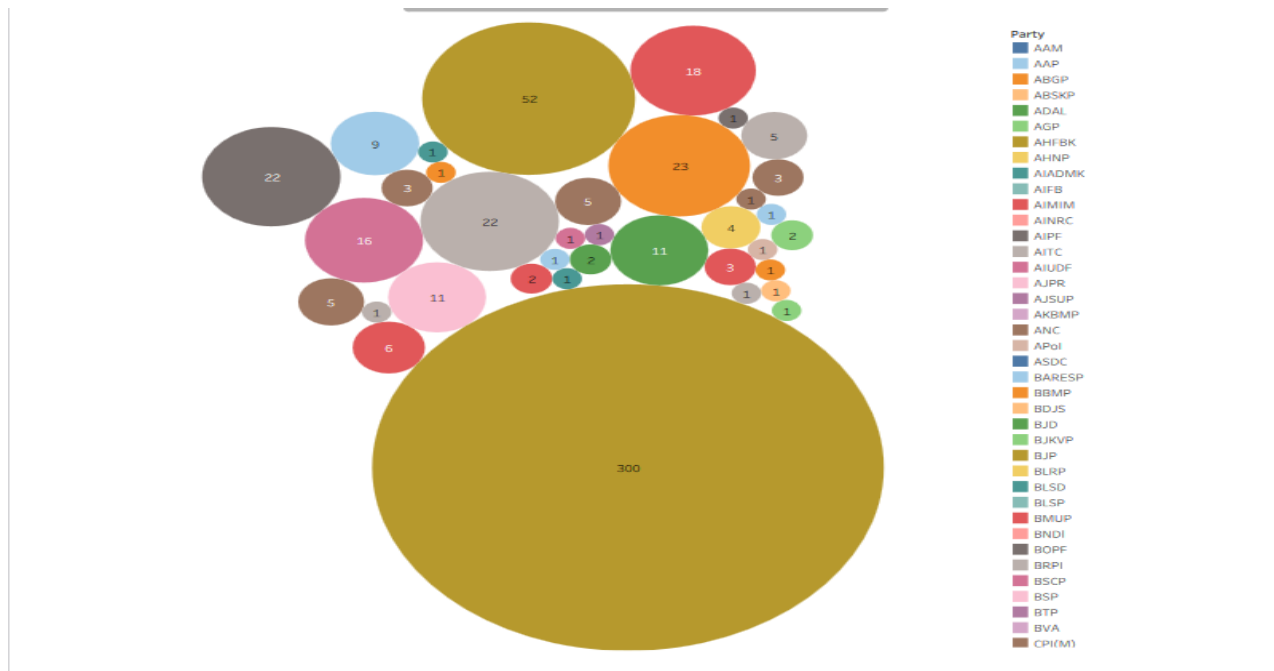

3.5. Winners by Education and Category – 2:

Discussion:

This visualization explains about the general votes based on gender and education

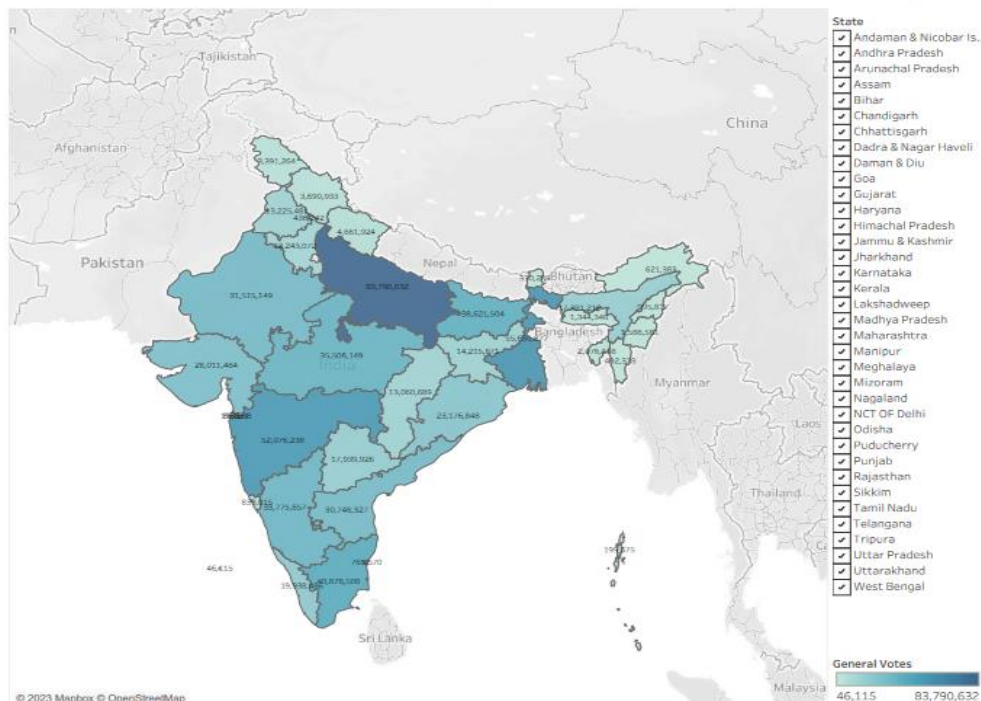

3.6. Party Wise Postal Votes – 3:

Discussion:

This visualization explains about the party votes on postal . Now a days postal votes also importance for declaring winners

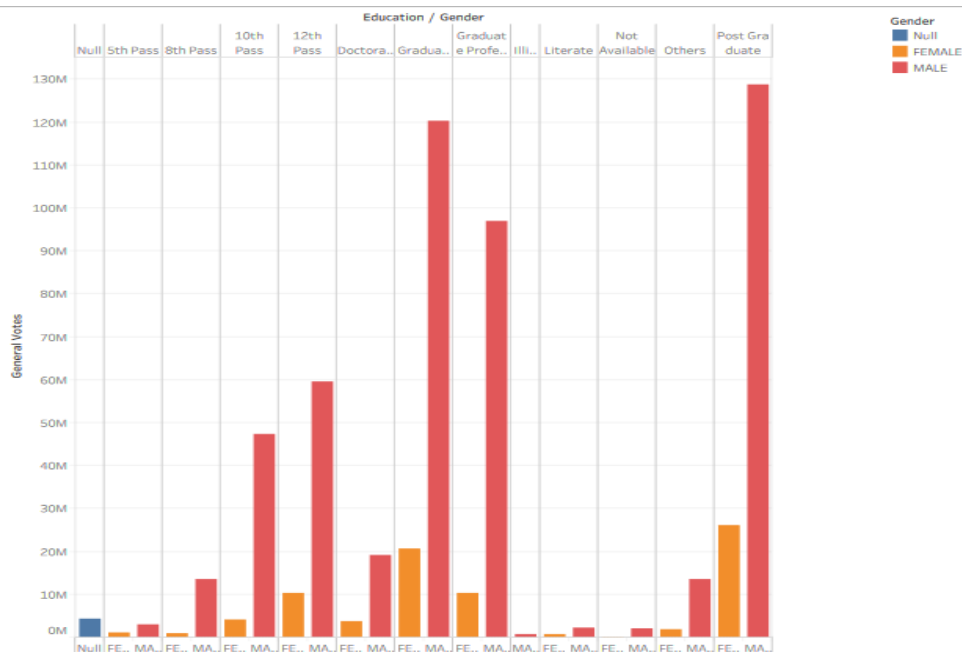

3.7. State wise General Votes – 4:

Discussion:

This visualization explains about the general votes on state ,here uttra pradesh has the high general votes

3.8. Education and Gender wise General votes – 5:

Discussion:

This visualization explains about the winners on educated category, here the educated people got higher possibility

6. CONCLUSION

In my idea the conclusion of this project is about voting methods and their results but the sad think is this knowledge only applicable for educated peoples. From this analysis, we have found that Indians are very much aware of the voting system and political parties. It is transparent that the total number of votes in Maharastra, Uttar Pradesh, and West Bengal are very much higher than the remaining states in India and Uttar Pradesh holds first place in the total number of votes.

7. FUTURE SCOPE

The 17th Lok Sabha or lower house of India's bicameral parliament was elected based on the results of the world's biggest election conducted in the summer of 2019. I want to say the final words of this project that is this knowledge is about our Indian voting so this knowledge is for all people of our country so spread this information to all and make sure our voting method is strong
